

Pretoria, 2 December 2015

To whom it may concern,

Angus Steele is a member of our Mechatronics and Micro-Manufacturing group who is busy with a Master's Degree in Mechatronics.

The content of his YREF Proposal project very much aligns with the activities of the larger group and Angus will therefore be able to receive technical or managerial support where necessary.

We strongly support his YREF application as it will help him to focus on the relevant work and gain valuable additional skills such as project reporting, management and creating research output.

Regards,

Peter Bosscha
